The Flash #1

by *Bill-E*

I'm not going to beat around the bush here. *Flash #1* is hands down the best title of the week.. Fancis Manapul's art is clean, smooth and gorgeous. The best thing about Manapul's art here is that he really captures The Flash in motion and may be the best I've seen The Flash drawn before. What really tips the scale on the art is colorist Brian Buccellato. Just flipping through this book without reading it; it will captivate you and the next thing you know you just spent \$3.99. Not to be out done here, is DC's golden boy Geoff Johns. There are no wasted pages within these 40 pages; Johns delivers big here with a great set up for what looks to be an amazing run. 9.5 out of 10...it's a Flash fact.
