Uncanny X-men #524

Bill-E

This week we get our newest installment in the X-crossover event. Story wise, this issue is definitely a well executed break from everything that has conspired during the last five chapters. It gives the readers time to reflect and process the event to this point, and it also lets the death of ***** sink in. Another good strength of this story is that we still see the chess game between Bastion and Cyclops continuing. New plans, new strategies and new players make this chess game even more deadly and even more exciting.

My only grievance is that I am very much on the fence with Terry Dodson's art. Many of the characters (esp. Cable & Magneto) look very identical. Characters in the back ground look very simplistic and plain. Close ups do reveal some good emotional expressions, yet I have seen better. Story wise this is getting a 7.5, art wise 6.0.
